# Press Release FOR IMMEDIATE RELEASE - Montreal QC Canada - May 6<sup>th</sup> 2016

## Patientel Networks Will Launch Anywhere Access June 1<sup>st</sup> 2016

Patientel Networks (“Patientel”) an affiliate of Hôpital Inc., is pleased to announce the June 1st, 2016 launch date of the company’s “Anywhere Access” web-based portal enabling patients, their families, and medical practitioners to access the complete PatientLogix Media Studio from any remote location (home, work, clinic) via digital devices; PC, Tablet, Windows 10 (native) via Microsoft Azure.

Anywhere Access educates patients and their family members, via video, of pre admittance and post discharge activities, such as general wellness, surgery prep, surgical procedures, expectations regarding hospital stay, importance of medication. PatientLogix will also include in an upcoming release mobile messaging capability and calendaring functionality for doctors’ appointments and medication reminders to diarize.

The PatientLogix cloud platform delivers as many as several thousand patient education videos and related questionnaires to patients and their family members. Videos are accessed via nurse/doctor prescriptions and notifications to patients and or on-demand or pre-scheduled channels for in hospital use and access.

Educated patients and their family members lead to better outcomes, higher levels of patient satisfaction, lower healthcare costs, improved staff productivity, and higher HCAHP scores.

“Patientel Networks chose Azure to host its applications due to its broad set of international and industry-specific compliance standards inclusive of HIPAA, its reliability and best practices in security-enhanced, privacy policy and procedures all of which are vital components hospital stakeholders can expect in a patient education platform”, said Gary Schneider President of Patientel.

“The introduction of Anywhere Access on Azure has the potential to be transformative to evolving patient education efforts,” said Nicole Herskowitz, Senior Director of Product Marketing, Microsoft Azure. “With Anywhere Access, caregivers now have a productive and cost-effective way of delivering care at all touchpoints in the healthcare continuum.”

Anywhere Access is available either as a standalone service or as a component to the complete PatientLogix Media Studio delivery platform. Between now and June 1st, Patientel, as part of its launch campaign, is offering Anywhere Access without any set-up and upfront fees.

To find out more about Anywhere Access and PatientLogix, please email or call Gary Schneider President, Serge Legault VP/CTO, Tony Duarte Director of Business Development or Vince Russo Sales Director.
